

Bracelet size guide

To measure the circumference of the wrist:

1. Take a measuring tape, string or strip of paper.
2. Wrap it around the wrist where you will wear the bracelet and mark the point where the ends join.
3. Lay the string or paper strip on a flat surface and use a ruler to measure the length to the point you marked.
4. Use the table to find the Chantecler bracelet size that best suits you.
